Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. The following claims are vague and indefinite:

- i. Claims 1 and 8 states that there is a step of preparing the thin film magnetic head; however, nothing about what is being prepared or what is being defined as preparing something has been set forth.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 3-6, and 8-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Yanagida et al (6604989).

Yanagida et al disclose and teach a method having the steps of preparing a thin film magnet (11 and see description of relate prior art); a heater (41 and 181 is a plurality of heaters), and a lapping process.

4. Claims 1, 3-6, and 8-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Maeda et al (6074283).

Maeda et al disclose and teach a method having the steps of preparing a thin film magnet (2, 3, and see col.6, lines 10-15); a plurality of heaters (54-55 , 131, and see fig. 20a), and a lapping process (11,20 and 30).

Allowable Subject Matter

5. Claims 2, 7, and 12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Oyama et al, Ota et al, Fatula jr et al, and Sasaki et al disclose a method.
